UP!

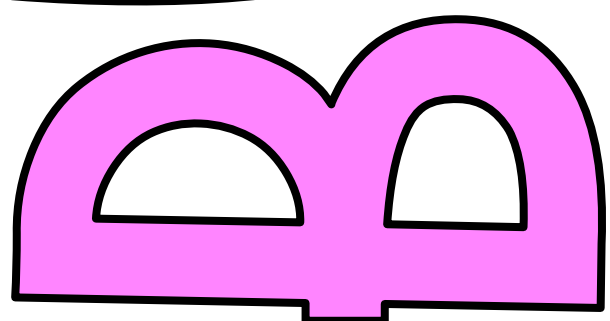

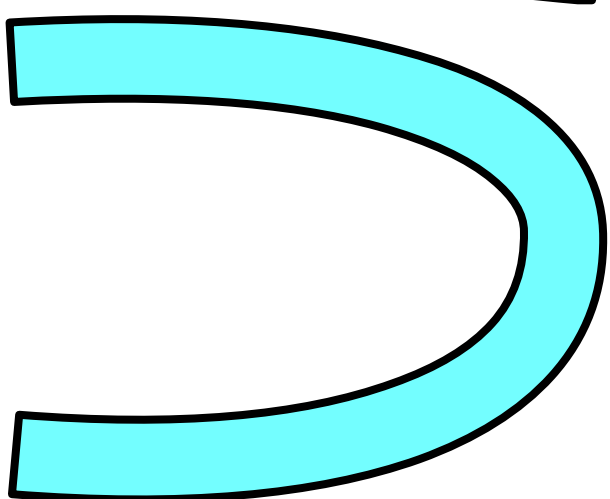

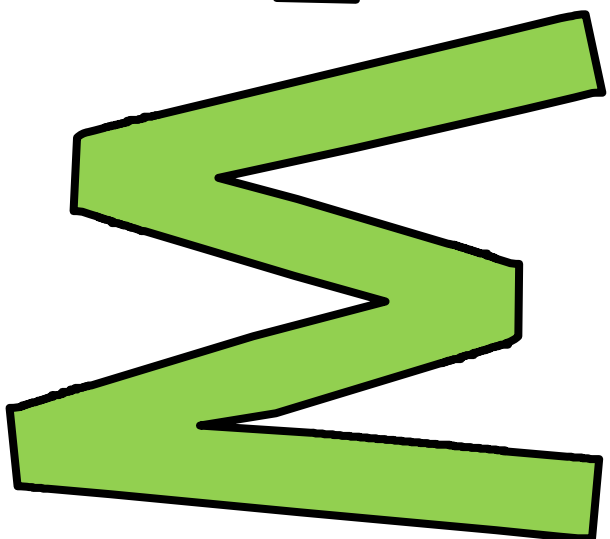

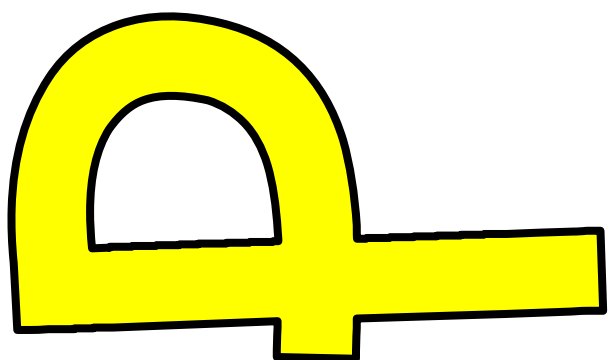

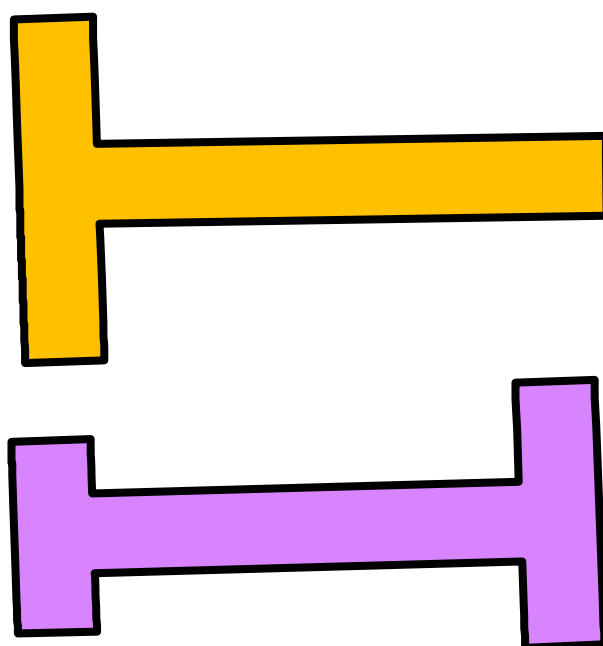

Goal setting display!

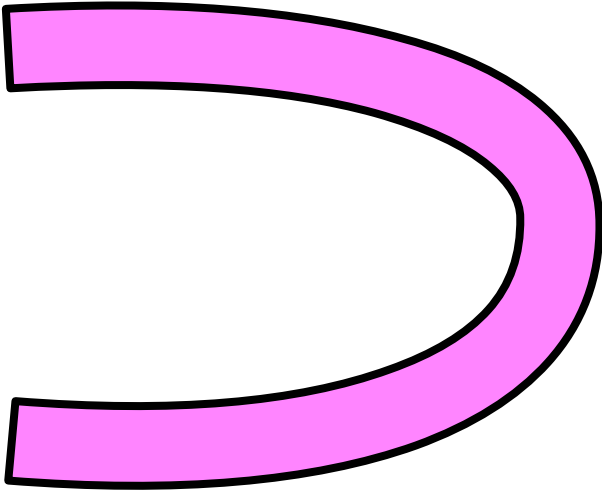

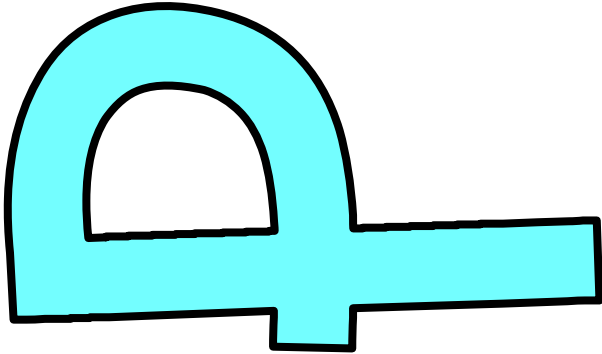

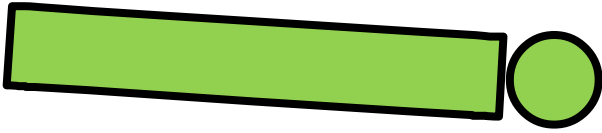

How to display

This 'bump it up' display is the perfect way to encourage your students to strive towards their personal goals. Paired with work samples and success criteria, it makes lesson criteria explicit to students and encourages them to self-reflect. To create this resource, simply print, laminate and display! I have also included criteria labels if you wish to include points for each work sample. They have been left blank so you can use them again and again by writing in whiteboard marker.

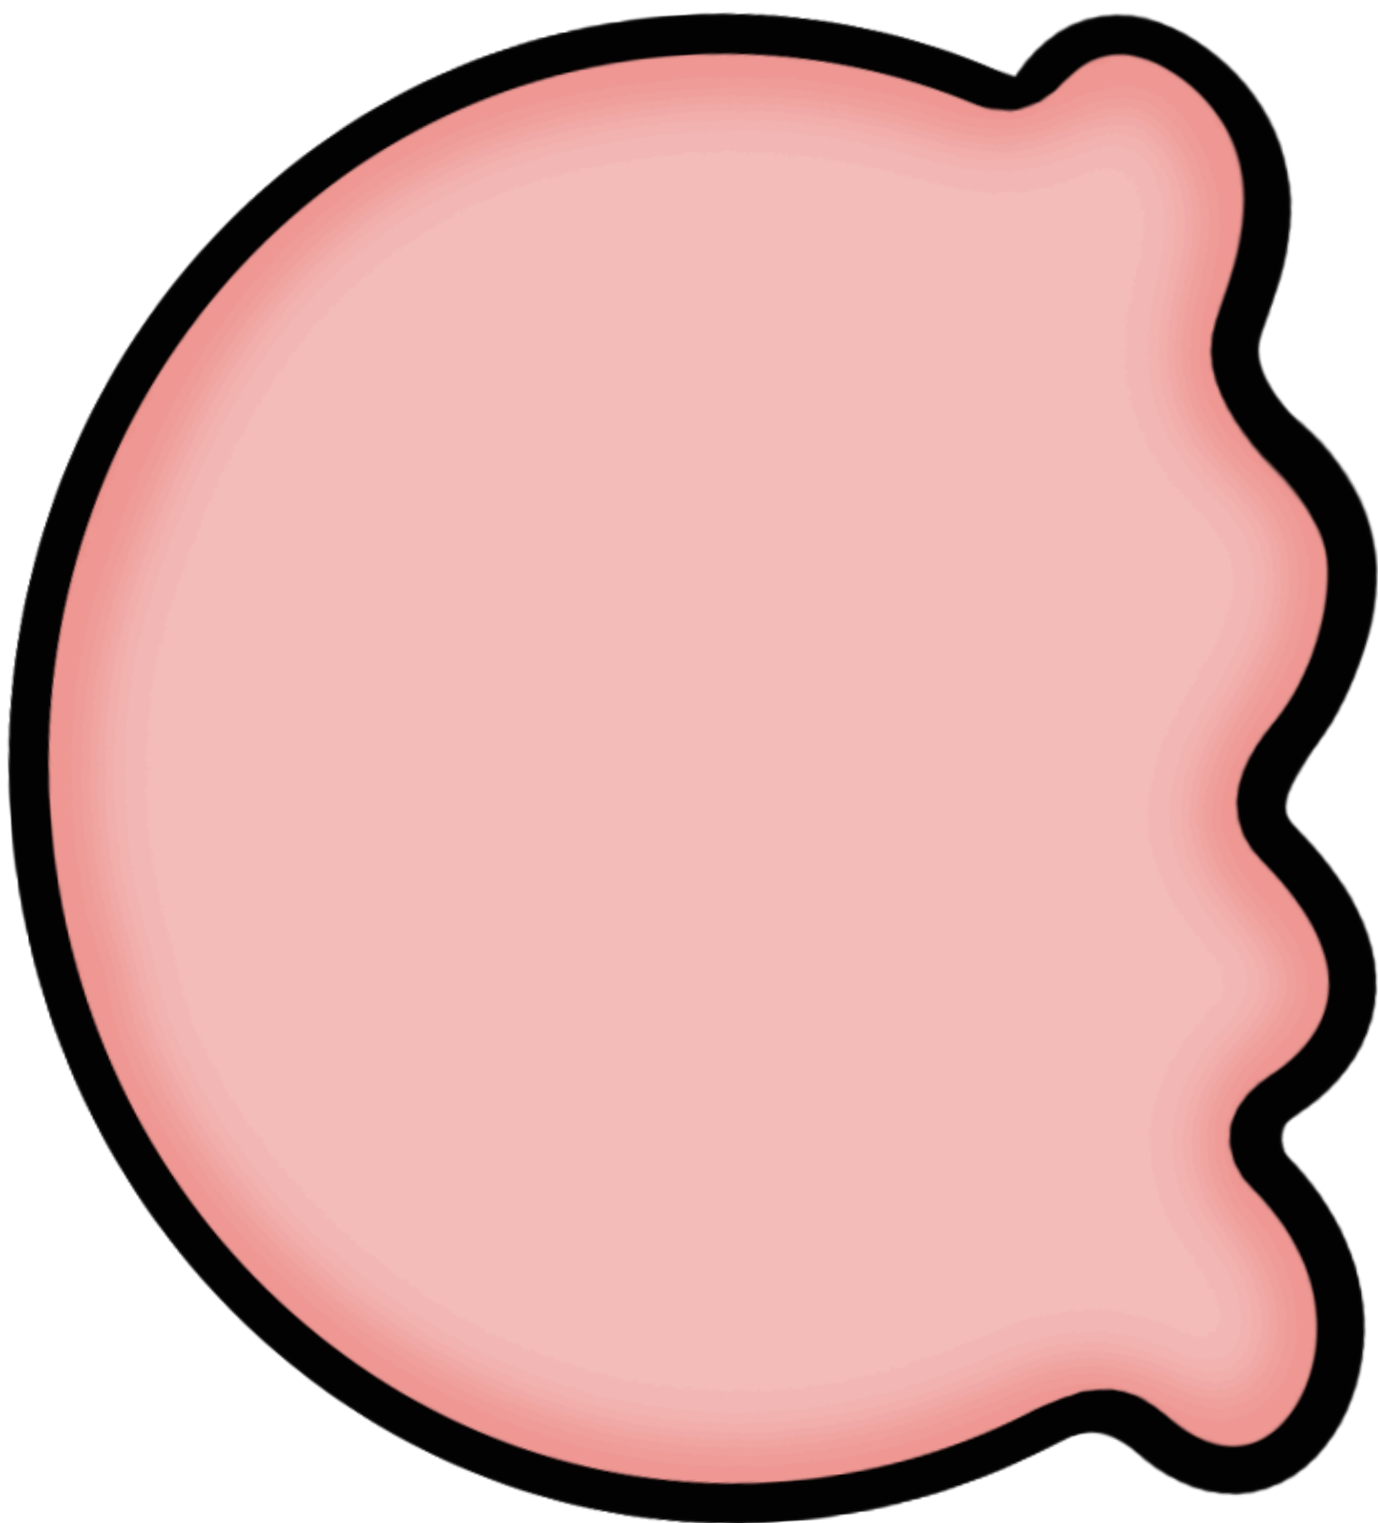

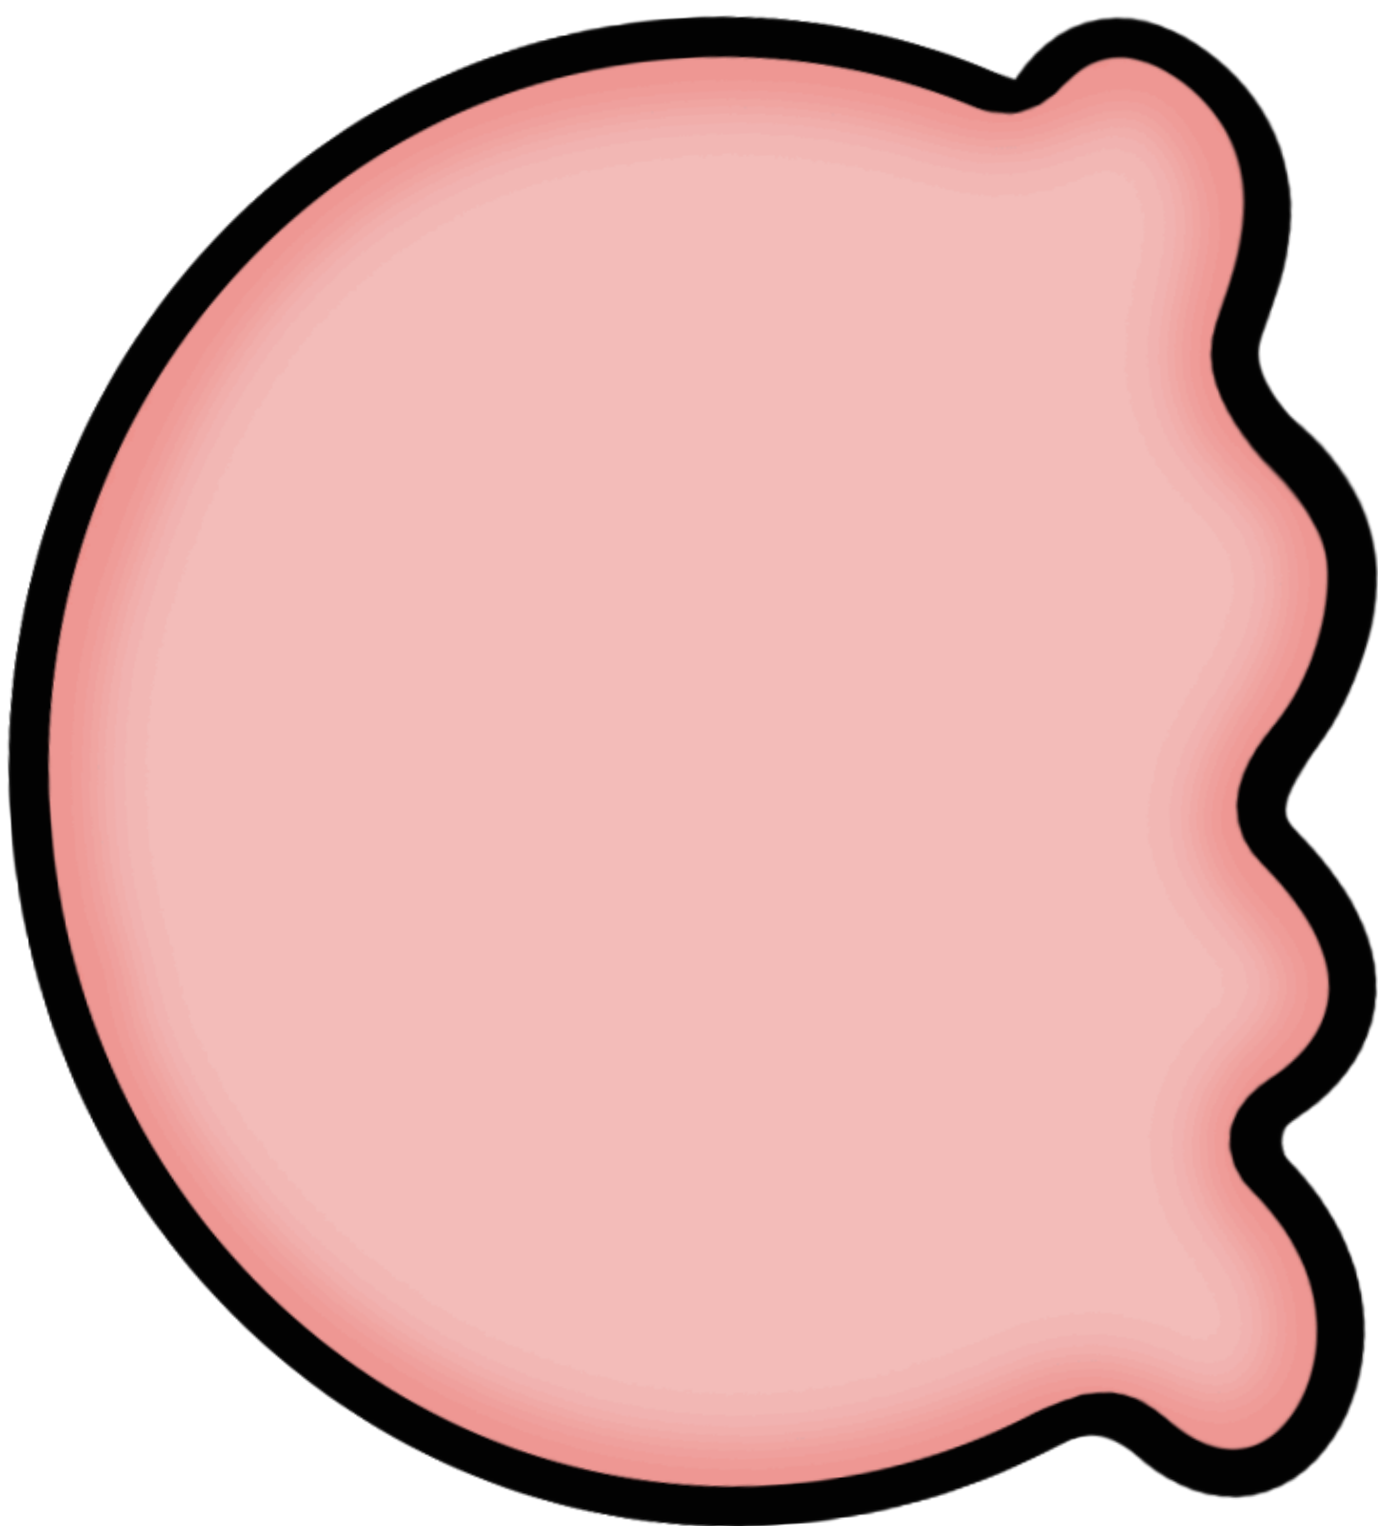

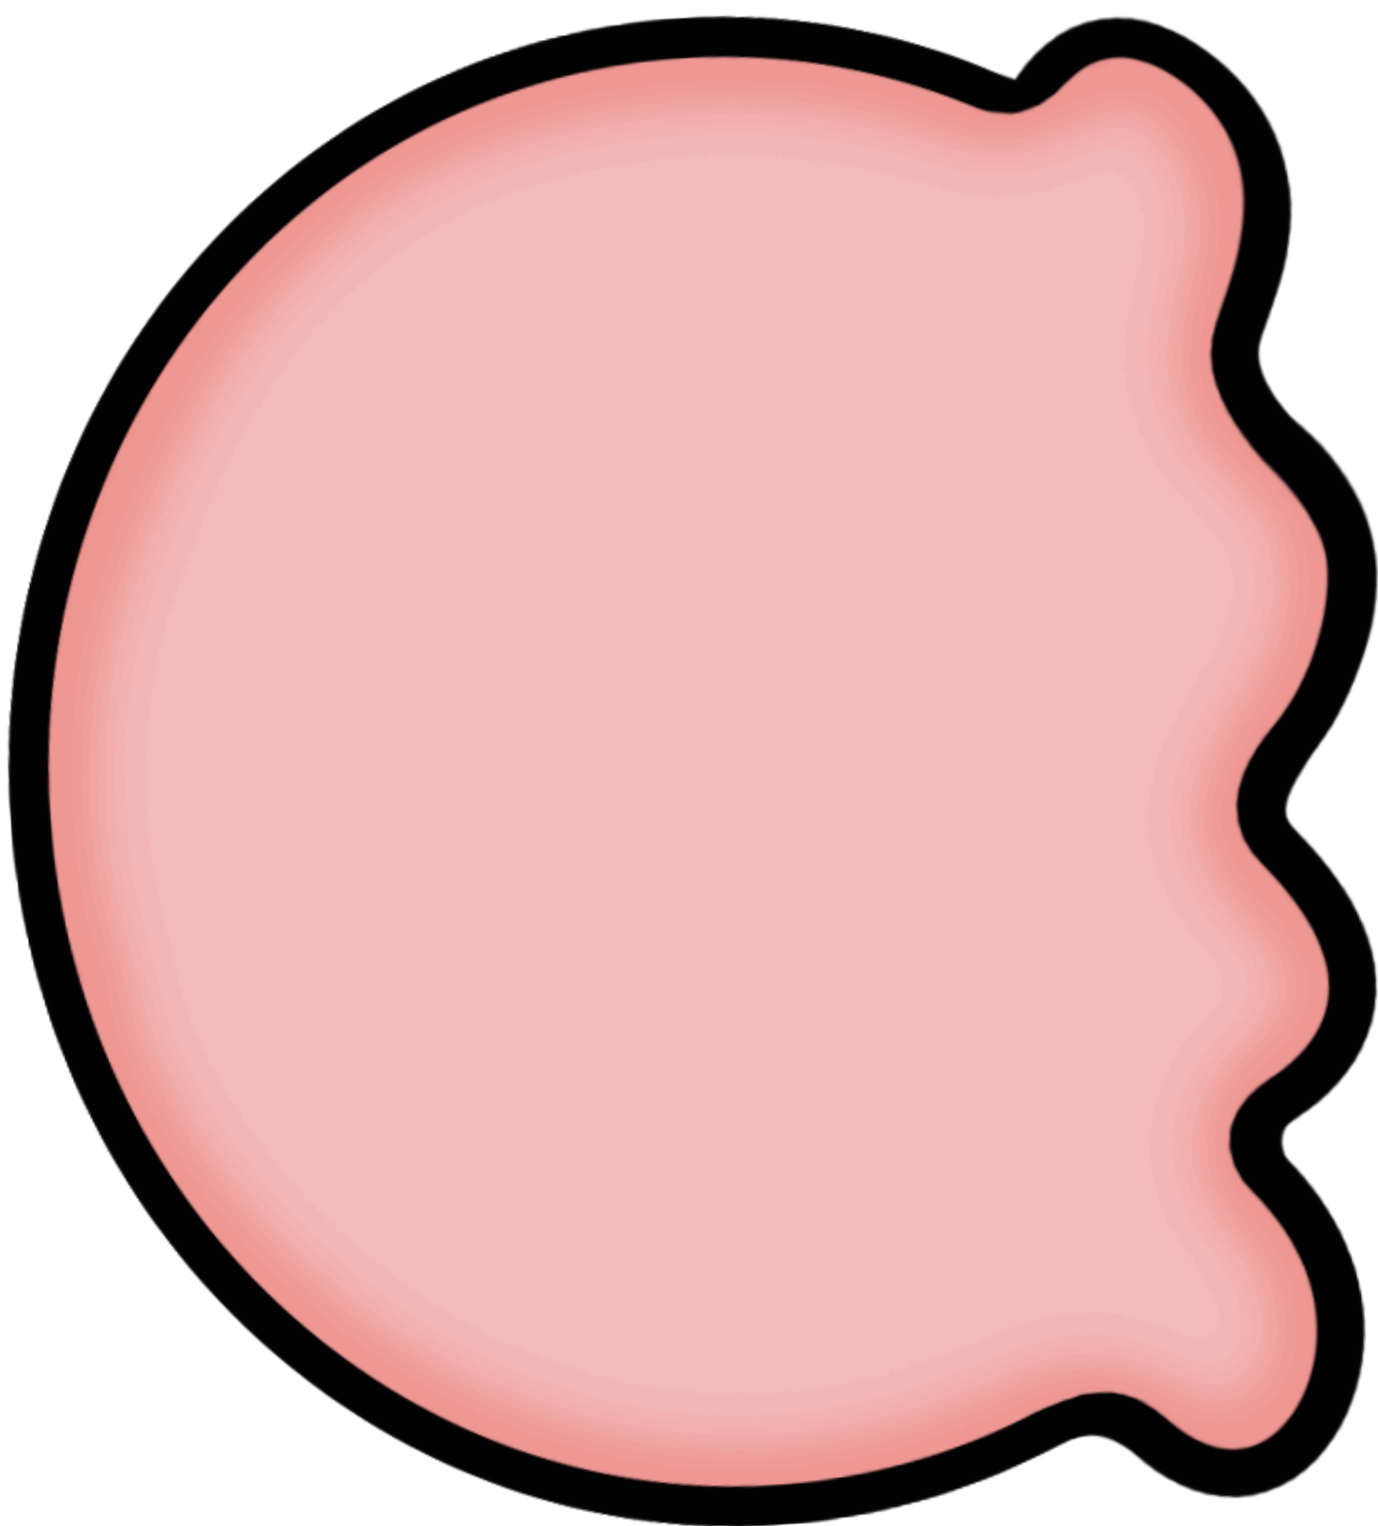

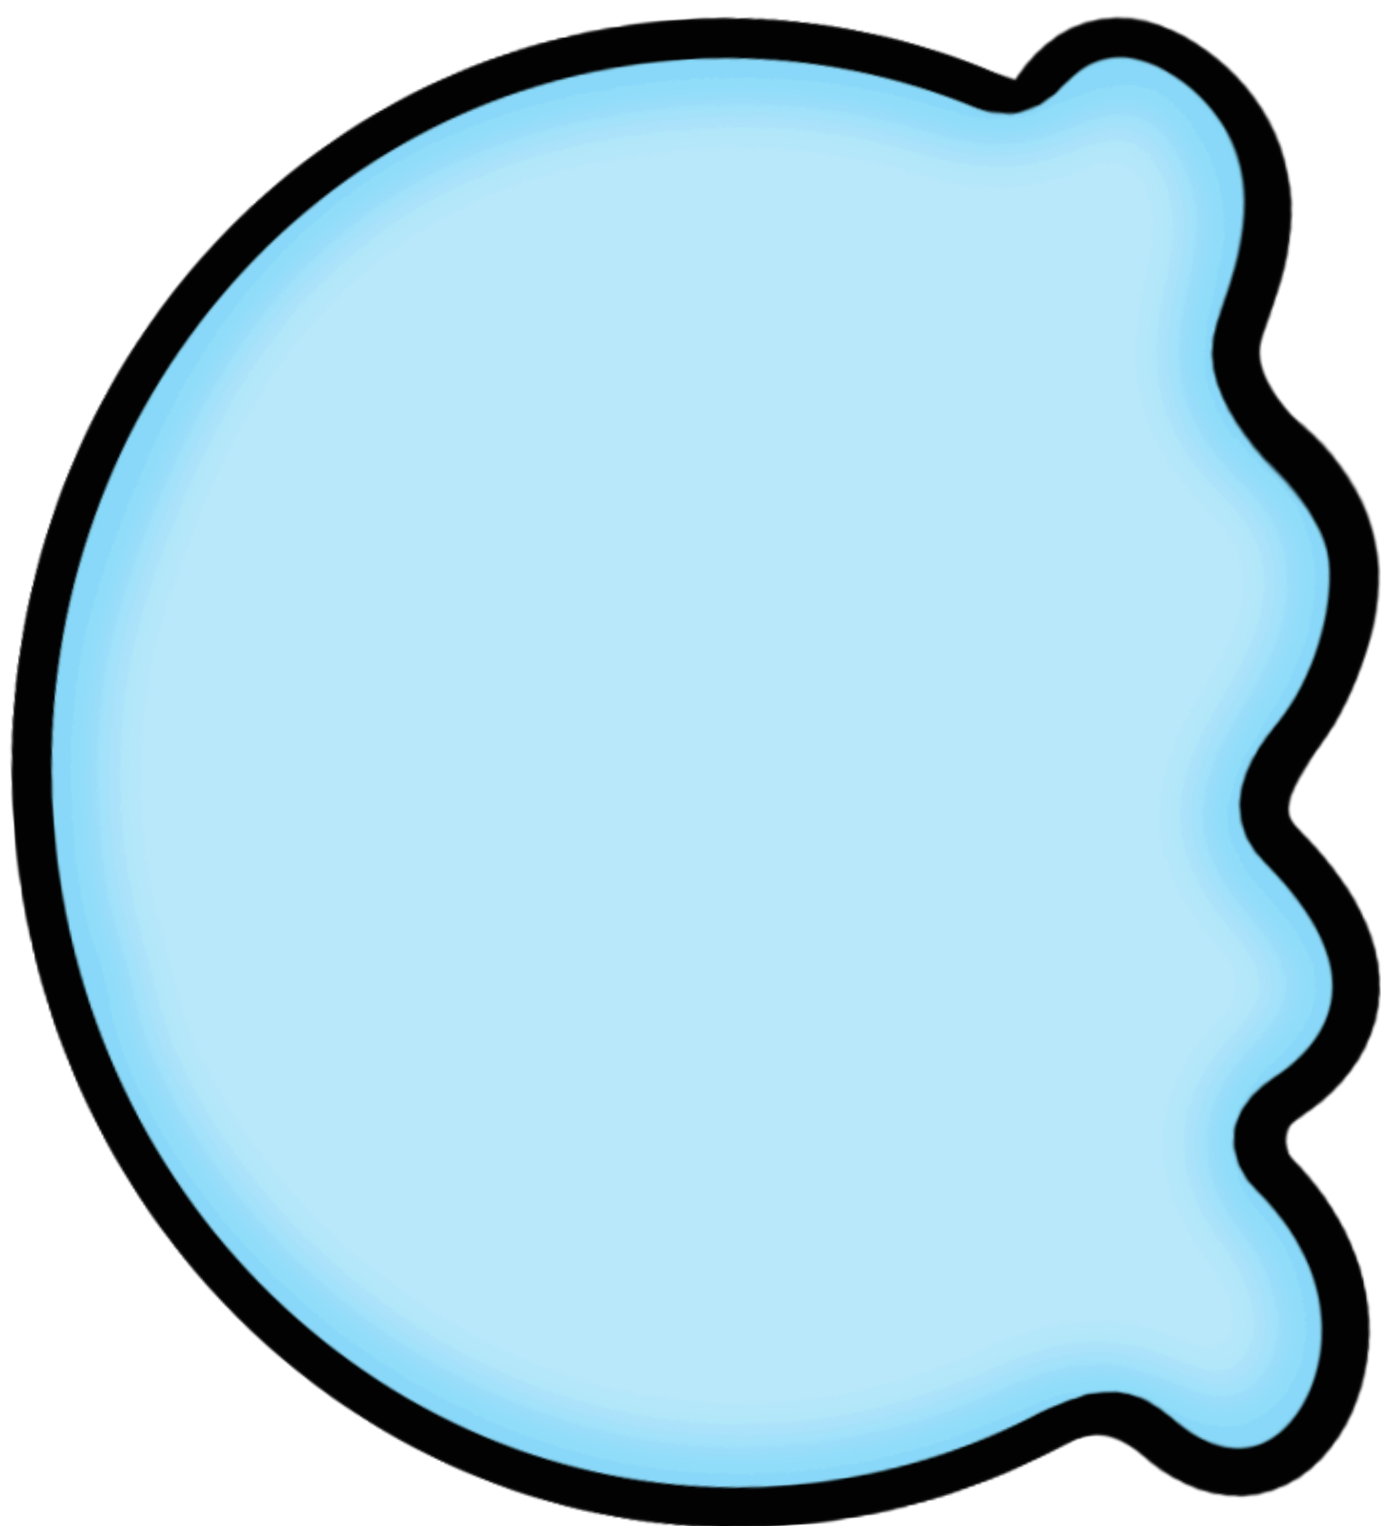

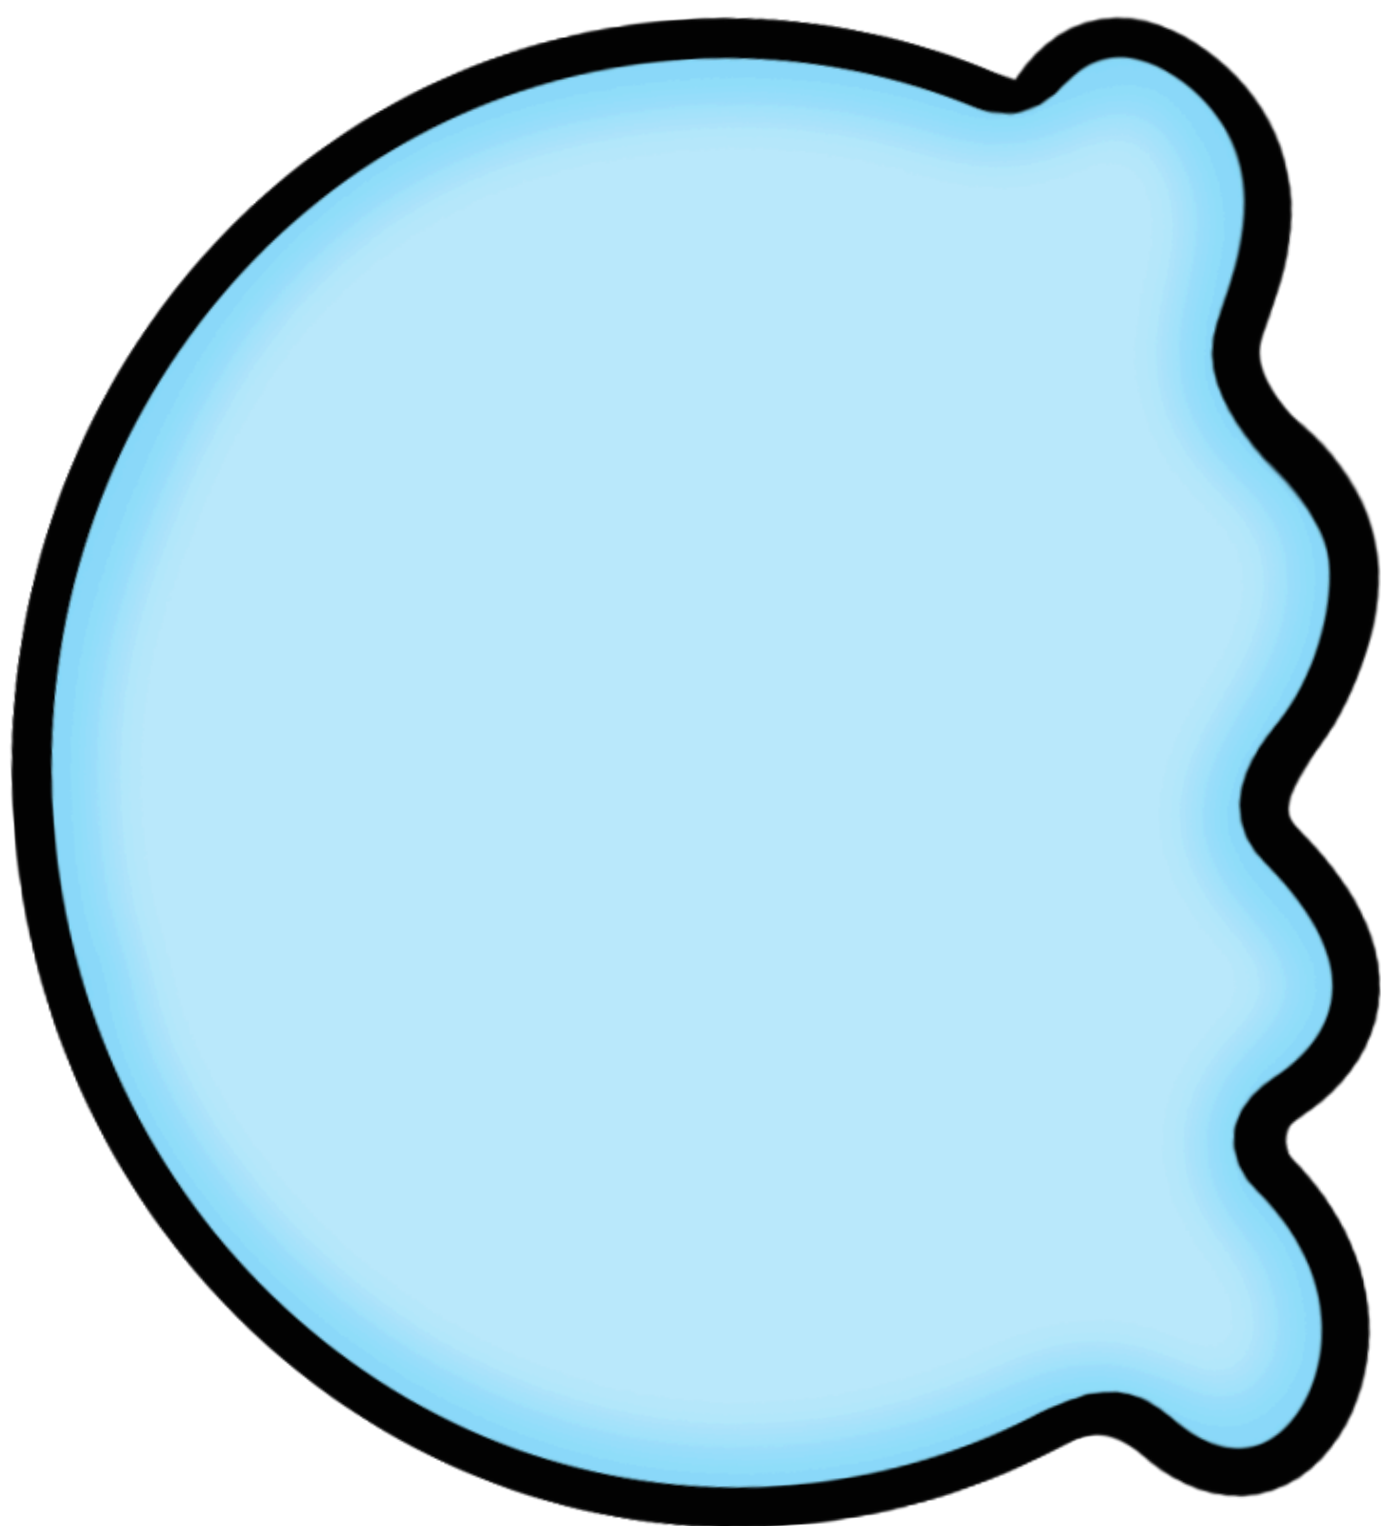

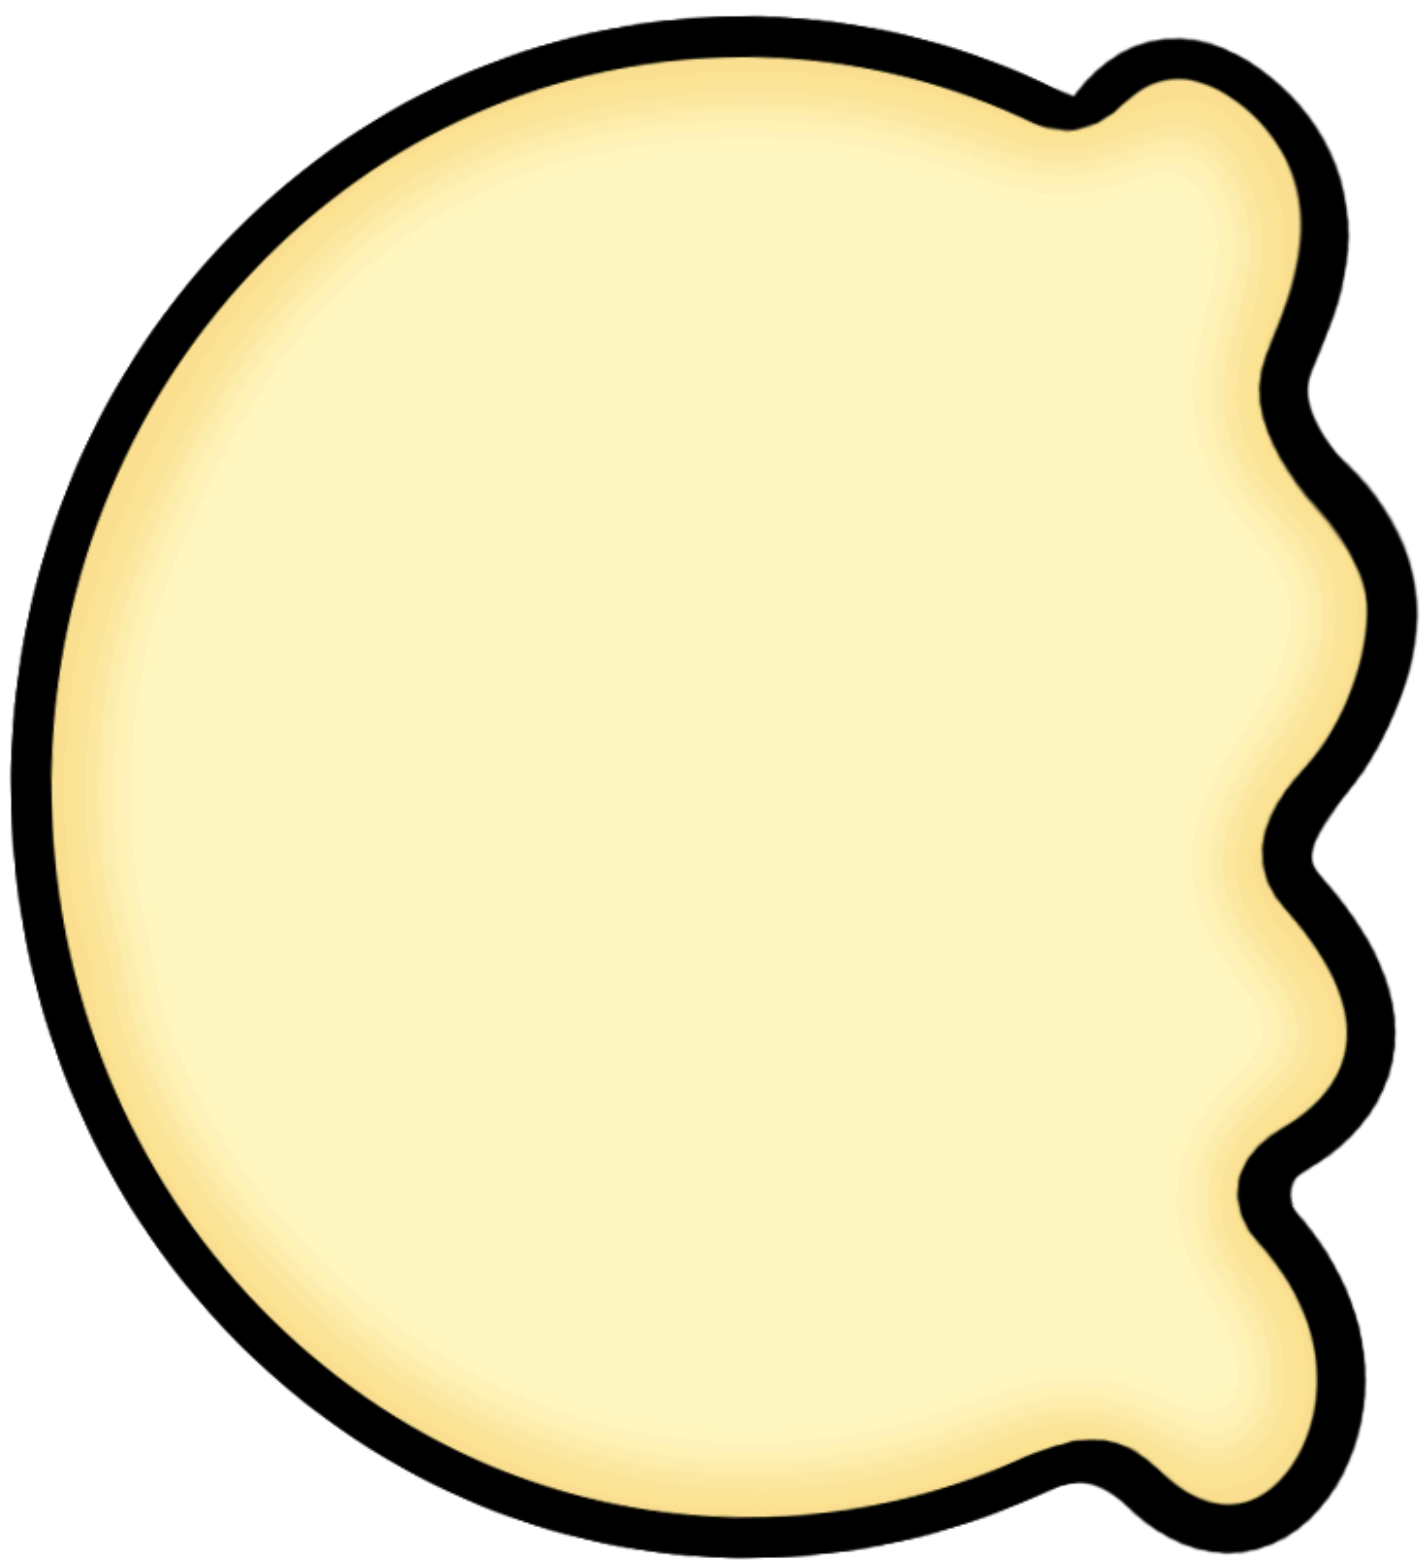

A huge thank you to these
designers...
